

Flash forward *to accurate results!*

Alegria Flash

Fast, flexible, and fully
automated CLIA diagnostics for
diverse laboratory workflows

sebia 

The new language of life

Accelerating Accurate CLIA Diagnostics

The Alegria Flash is a state of the art, fully automated, random access CLIA analyzer designed to meet the demands of fast paced diagnostic environments.

Immediate assay activation, intelligent automation, and end to end traceability enable high quality results with minimal user intervention.

Flexibility for Demanding Workflows

- **Instant assay activation** thanks to rapid magnetic bead mixing in just 5 minutes — start testing without delay.
- **Continuous sample loading:** add or remove samples, consumables, and waste at any time for uninterrupted operation.
- **Random access testing** supports STAT samples, reflex testing, and automatic reruns at any point in the workflow.

Reliability for Confident Decision Making

- **Full traceability** through 2D barcodes and RFID tags for every sample, cartridge, and calibrator — with all data stored automatically in the instrument database.
- **Anchor® Tips** provide precise pipetting and correct positioning for seamless, reliable automation from pick-up to release
- Disposable tips minimize cross contamination risks for consistently clean and dependable results.
- RFID-monitored reagent cartridges ensure traceability of onboard stability, lot numbers, remaining tests, calibration status, and expiry across different devices.

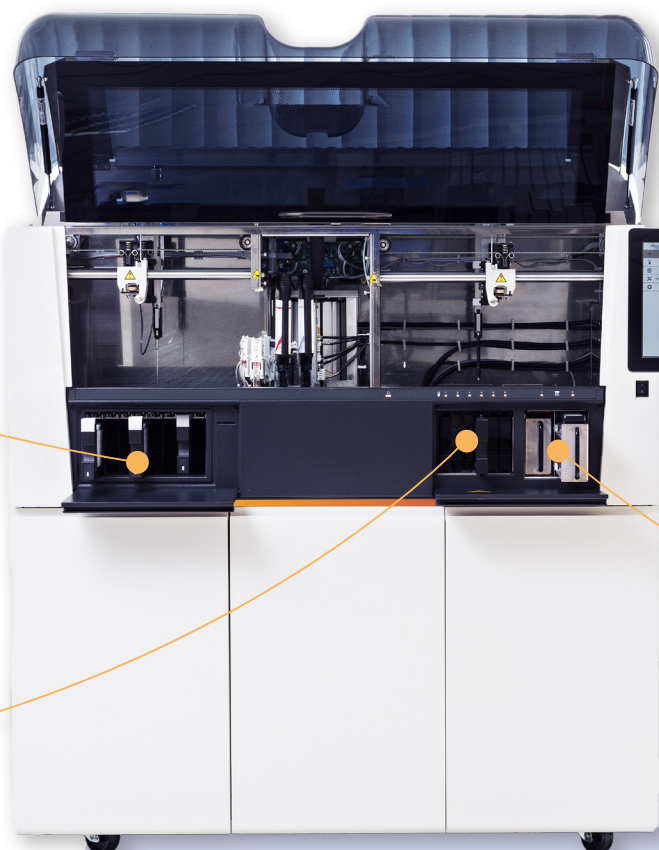

Alegria Flash – Elevates CLIA technology with instant readiness and intelligent workflow automation. Achieve rapid, accurate, and traceable patient results with confidence and ease.

Efficiency for Speed and Cost Effectiveness

- **High throughput** of up to **120 tests per hour*** and **30 minute time to first result*** keeps pace with demanding labs.
- **Results follow in 30 second intervals**, keeping your workflow moving without delay.
- Sample loading bay for **up to 72 samples**, combined with long walk away time, frees valuable staff resources.
- Intuitive operation via a large **18.5" touchscreen** with modern, workflow oriented software.

Alegria Flash Specifications

Description	Fully automated chemiluminescent immunoassay analyzer (CLIA)
Operation mode	Random access, continuous loading and STAT capability
Continuous loading	Samples, reagents and consumables
Throughput	Up to 120 tests/hour*
Time to 1 st result	30 minutes*
Capacity	• Up to 72 samples on 6 racks • Up to 16 assay cartridges on 8 rack • Typically 80 tests per assay cartridge • Up to 500 cuvettes on board

Reagent Handling	Ready to use CLIA cartridges
User Interface	18.5" touchscreen monitor
Dimensions (without monitor)	133 × 70 × 147 cm 52" × 27" × 58" (W x D x H)
Weight	277 kg (611 lbs)

* Assay dependent

Ordering information

Reagents

- Alegria Flash CTD Screen*CL28121
- Alegria Flash ENA Screen*CL28051
- Alegria Flash SSA-52*CL28011
- Alegria Flash SSA-60*CL28001
- Alegria Flash SSB*CL28021

Controls

- Alegria Flash CTD Screen Control Kit*CL28121CK
- Alegria Flash ENA Screen Control Kit*CL28051CK
- Alegria Flash SSA-52 Control Kit*CL28011CK
- Alegria Flash SSA-60 Control Kit*CL28001CK
- Alegria Flash SSB Control Kit*CL28021CK

Planned panels:

- Connective Tissue Disease
- Celiac Disease
- Rheumatoid Arthritis
- Antiphospholipid Syndrome
- Gastrointestinal Diseases

The Alegria Flash assay menu will expand progressively, adding a broad range of autoimmune markers as FDA and IVDR approvals progress.

* FDA cleared

Instruments

- Alegria FlashSE10108093
